

Elite[®] air conditioners come appointed with:

Precision-balanced, direct drive fan to keep the noise low and the savings high

Reinforced with a PermaGuard™ cabinet for long-lasting protection against rust and corrosion

SmartHinge™ design allows for easy coil cleaning

Softer lines create an appliance-like appearance

Cabinets built using superior materials and proprietary designs make Lennox[®] units more durable, safer and easier to install

Seasonal Energy Efficiency Ratio (SEER)

This rating determines an air conditioner's efficiency. The higher the SEER rating, the more energy-efficient it is.

Quantum™ Coil

Our exclusive coil is made from a proprietary aluminum alloy for improved resistance to corrosion, resulting in improved performance and energy savings.

Digital-Ready Unit

A unit that maximizes its efficiency with digital communication features when paired with the Lennox S30 Smart Thermostat and other digitally-enabled components. On its own, it's remarkably efficient, compact and quiet—and ready to step up to a fully communicating system at any time.

ENERGY STAR® Certified

HVAC equipment with the ENERGY STAR label meets or exceeds federal guidelines for energy-efficient performance.

Digitally-Enabled Option

A digitally-enabled product is designed to work with a Lennox Smart Thermostat as part of an advanced home comfort system. This is a truly digital product that offers unprecedented control, giving you the ability to more precisely maintain temperature, humidity, and air quality compared to older analog systems.

Warranty Your Way™

All Elite models come with a 10-Year Limited Warranty on compressors and a 5-Year Limited Warranty on covered components. A 10-Year Extended Limited Warranty is available with product registration. For more information, visit www.Lennox.com/WarrantyYourWay.

How does single-stage, two-stage & variable-capacity work?

72°

Single-Stage

Unit is either on or off, creating wide temperature swings.

72°

Two-Stage

Unit runs at either low or high speed, using the lower speed 80% of the time.

72°

Variable-Capacity

Unit runs at low most of the time, using only the amount of energy necessary to meet comfort need.
